MONACARE

The Healthcare Coordination Platform for Monaco

SEED ROUND - 2026

Confidential - For Investor Use Only

PROJECT OVERVIEW

Coordinated home care, reimagined for Monaco.

MONACARE connects patients, their families, healthcare professionals, home companions and legal guardians around a single secure platform - the coordinated home care hub Monaco does not yet have.

- Role-based access - family, medical, companion, guardian
- Biometric-locked Medical Vault + voice dictation
- Administrator-validated accounts - zero unauthorised access
- Real-time cloud sync across all devices (Firebase)

CURRENT STATUS

- Working prototype live on Vercel.
- Firebase Auth + Firestore - real-time sync.
- Beta-ready. Awaiting first pilot clinics.

REGULATORY CONTEXT

- Monaco Loi n.1165 - CCIN authority.
- CCIN declaration: to be filed.
- HDS-certified hosting: required for production.

BUSINESS MODEL

- B2C: families pay from EUR29/month.
- Professionals & companions: always free.
- Guardians/curators: tiered plan.

VISION

- Monaco pilot -> Cote d'Azur expansion.
- The reference platform for coordinated
- home care in southern Europe.

Healthcare Coordination Is Broken

Patients are at the centre - but care teams and families are disconnected.

No Single Source of Truth

Families receive updates by phone, WhatsApp or not at all. Medical notes are scattered across paper files, emails and private messages.

No Secure Patient Hub

Sensitive vital signs and clinical notes are shared informally. There is no RGPD-compliant, access-controlled record for home care.

Professionals Waste Hours

Care professionals spend up to 30% of their time on coordination admin - chasing updates, repeating information, managing access.

MONACARE

Our Solution

MONACARE

A secure, all-in-one platform connecting patients, families and healthcare professionals - purpose-built for the Monaco medical ecosystem.

- Real-time care updates between teams & families
- Biometric-secured Medical Vault with vital signs
- Role-based access - validated by administrator

A Platform Built for Healthcare

Four core modules - available on any device, in real time.

The Flux

Activity Feed

A real-time feed shared between care professionals, companions and families. Role-based visibility: Public, Team-only, or Medical-only. No more informal messaging chains.

Medical Vault

Secured Clinical Records

Biometric-locked storage for vital signs, pain tracking and voice-dictated clinical notes - with interactive charts. Accessible from any device.

Role-Based Access

Validated Permissions

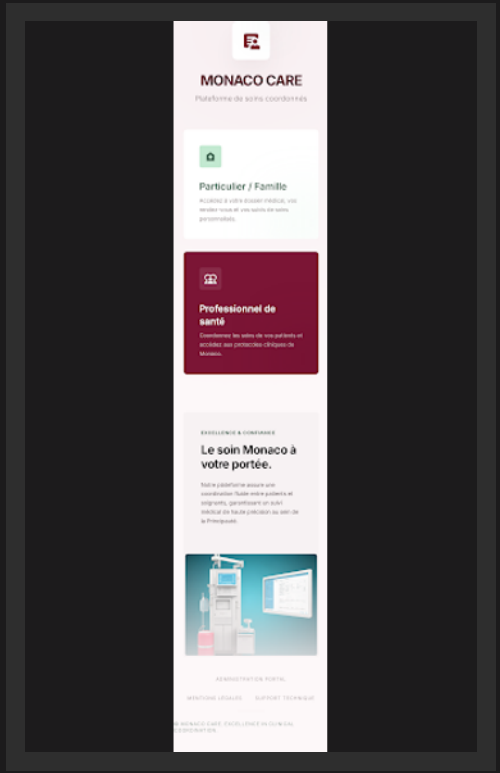
Every user - family, nurse, doctor, aide - gets a tailored view. No self-sign-up: each account is manually validated by the clinic administrator.

Secure Messaging

Professional Communication

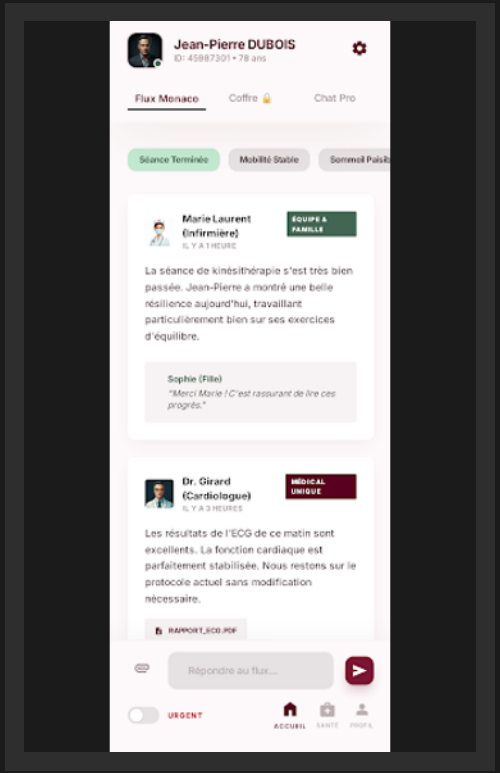
Structured, encrypted care team chat organised by patient. No personal email, no WhatsApp - a compliant channel for every professional interaction.

Product in Action



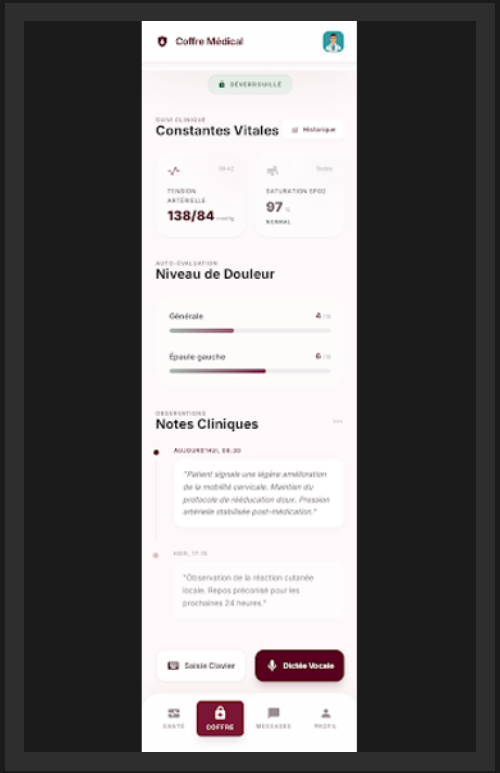
Welcome & Login

Role-based onboarding with access code or professional ID



The Flux

Real-time activity feed - medical, team & public visibility levels



Medical Vault

Biometric lock, vital signs charts & clinical dictation

Designed for Every Stakeholder

Four distinct profiles - each with tailored permissions, access level and pricing.

Family

From EUR29/mo

Receives a unique access code. Views the Flux, the assigned care team, and can log vital signs at home. Can approve or deny professional access requests.

Simplified UI | Approve access | Home vital log

Healthcare Professional

Free

Nurses, doctors, physiotherapists. Validated by the administrator before first login. Full Flux and Medical Vault access. Voice dictation for clinical notes.

Full Flux + Vault | Voice notes | Medical visibility only

Companion / Aide

Free

Non-medical home workers: housekeepers, meal assistants, delivery staff. Log daily activity updates visible to families. No medical data access.

Activity logging | Flux only | No medical data

Guardian / Curator

Tiered plan

Legal guardians or professional curators managing multiple patients. A consolidated dashboard across all cases with sliding-scale subscription by caseload.

Multi-patient dashboard | Tiered pricing | Full oversight

A High-Value, Measurable Market

Monaco: concentrated seniors, solvent families, and a 200,000-person addressable basin beyond its borders.

38,857

RESIDENTS

Total population, Principality of Monaco, 2025

27.2%

AGED 65+

10,574 residents - more than 1 in 4

14.9%

AGED 75+

5,798 residents needing intensive home support

204,441

EXTENDED BASIN

People 65+ in the surrounding municipalities

Structured Healthcare Ecosystem

- 845 beds & places at CHPG - 443 in geriatric & home care
- 4,168 private-sector employees in health & social services
- IFAS nursing aide training at CHPG - dedicated pipeline
- CCIN / Loi n.1165 - independent regulatory authority

Sources: CHPG (chpg.mc) / IMSEE Emploi 2025

A Population Built for Long-Term Care

87.0 years

Life expectancy - Monegasque nationals

Men 84.0 / Women 90.2 (2022-2024)

- Average age of Monegasque nationals: 45.1 years
- Over 15% of Monegasque nationals are 75 or older
- Gateway to the French Riviera - same language, adjacent demographics

Note: life expectancy & age data concern Monegasque nationals, not all residents / Source: IMSEE Observatoire 2024

Population & basin data: IMSEE Monaco en Chiffres 2025 - Population & Cadre de vie / imsee.mc

Business Model

Families and guardians subscribe. Professionals and companions are always free.

Family Subscription

Paid by the family - professionals are always free

1 patient	**EUR29 / month**
Additional patient	**+ EUR15 / month**
Healthcare professionals & companions Always free - unlimited per patient	**FREE**

Guardian / Curator Plan

Sliding scale - all care professionals included free

Up to 10 patients	**EUR250 / month**
Up to 30 patients	**EUR399 / month**
40+ patients	**Custom**

Revenue grows with each patient activated. Year 1 target: 200 family subscriptions + 10 guardian accounts.

Roadmap to Market

From funded beta to scaled platform - in 18 months.

Q2 2026

Beta Launch

Seed funding closed. 3 pilot care agencies in Monaco. Full Firebase backend.

Q3 2026

Compliance

CCIN declaration. HDS-certified hosting migration. First paying clients.

Q4 2026

Growth

15+ care teams onboarded. Mobile app (iOS/Android) published.

2027

Expansion

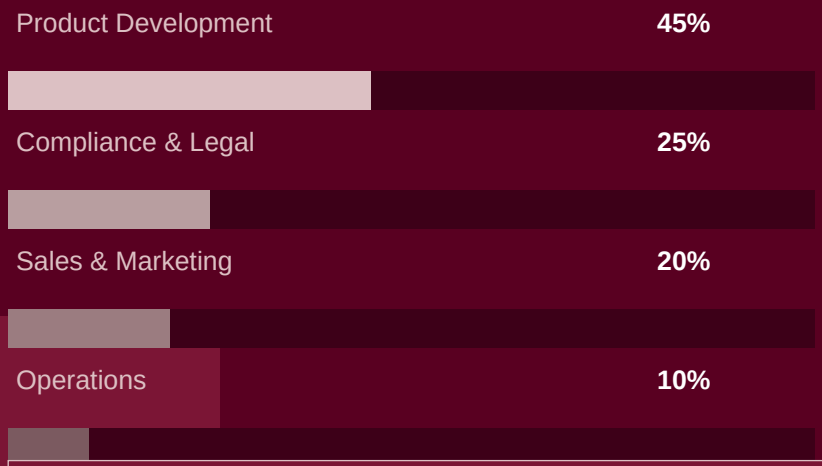
Series A funding round. Cote d'Azur launch (Nice, Cannes, Antibes).

Investment Opportunity

Building the Standard for Coordinated Home Care

Starting in Monaco - scaling to the French Riviera and beyond.

Where Investment Goes



What Investment Enables:

- Launch a 3-clinic beta in Monaco (Q3 2026)
- Achieve CCIN regulatory compliance
- Migrate to HDS-certified hosting
- Onboard 15+ paying care teams
- Publish iOS & Android native apps
