MONACARE

The Healthcare Coordination Platform for Monaco

SEED ROUND – 2026

Confidential - For Investor Use Only

In a Nutshell

The problem. The answer. The people.

THE PROBLEM

What is broken today

- Families are kept in the dark — updates arrive by WhatsApp or not at all.
- No secure, shared patient record for home care. Sensitive data is scattered.
- Care professionals waste hours on coordination admin instead of patient care.

THE ANSWER

MONACARE

A secure, all-in-one coordination platform purpose-built for Monaco.

- The Flux — real-time care feed with role-based visibility
- Medical Vault — biometric-locked vital signs & clinical notes
- Role-based access — validated by clinic administrator
- Secure messaging — no WhatsApp, no email chains

WHO WE SERVE

Target audience

Families

Managing an elderly parent at home — pay from EUR29/mo

Professionals

Nurses, doctors, physios — always free

Companions

Home aides, housekeepers — always free

Guardians

Legal curators managing multiple patients — tiered plan

PROJECT OVERVIEW

Coordinated home care, reimagined for Monaco.

MONACARE connects patients, their families, healthcare professionals, home companions and legal guardians around a single secure platform - the coordinated home care hub Monaco does not yet have.

- Role-based access - family, medical, companion, guardian
- Biometric-locked Medical Vault + voice dictation
- Administrator-validated accounts - zero unauthorised access
- Real-time cloud sync across all devices (Firebase)

REGULATORY CONTEXT

- Monaco Loi n.1165 - data protection enforced by CCIN.
- CCIN declaration: to be filed before launch.
- HDS-certified hosting: required for production data.

BUSINESS MODEL

- B2C: families pay from EUR29 / month per patient.
- Healthcare professionals & companions: always free.
- Guardians / curators: tiered plan by caseload.

VISION

- Monaco pilot - then French Riviera expansion.
- The reference platform for coordinated home care in southern Europe.

Healthcare Coordination Is Broken

Patients are at the centre - but care teams and families are disconnected.

N

No Single Source of Truth

Families receive updates by phone, WhatsApp or not at all. Medical notes are scattered across paper files, emails and private messages.

N

No Secure Patient Hub

Sensitive vital signs and clinical notes are shared informally. There is no RGPD-compliant, access-controlled record for home care.

P

Professionals Waste Hours

Care professionals spend significant time on coordination admin - chasing updates, repeating information, managing access across disjointed channels.

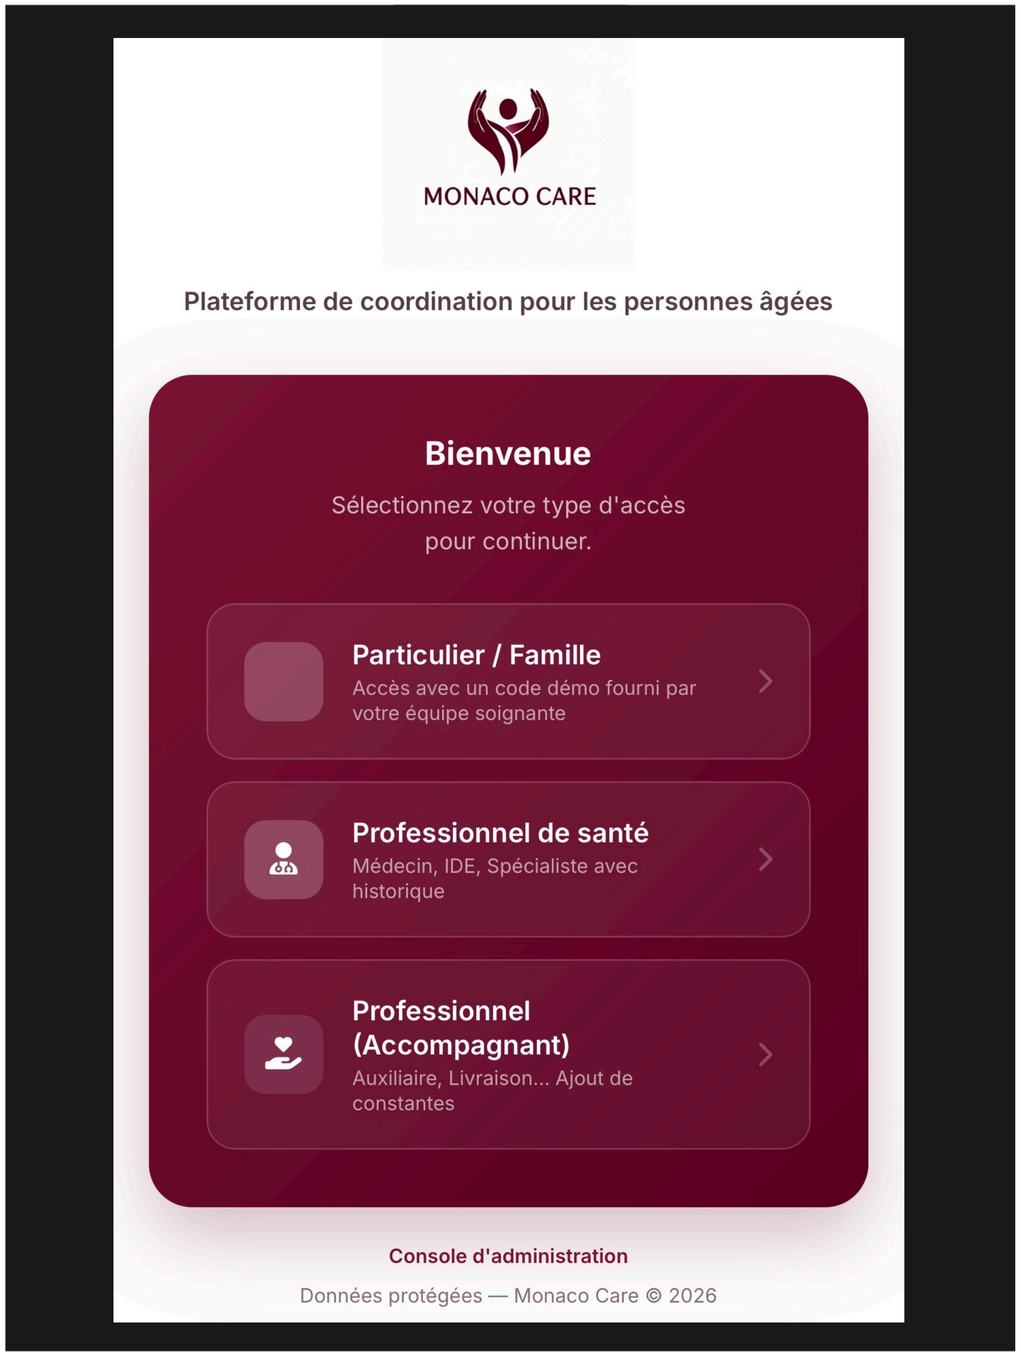
MONACARE

Our Solution

MONACARE

A secure, all-in-one platform connecting patients, families and healthcare professionals - purpose-built for the Monaco medical ecosystem.

- Real-time care updates between teams & families
- Biometric-secured Medical Vault with vital signs
- Role-based access - validated by administrator



A Platform Built for Healthcare

Four core modules - available on any device, in real time.

The Flux

Activity Feed

A real-time feed shared between care professionals, companions and families. Role-based visibility: Public, Team-only, or Medical-only. No more informal messaging chains.

Medical Vault

Secured Clinical Records

Biometric-locked storage for vital signs, pain tracking and voice-dictated clinical notes - with interactive charts. Accessible from any device.

Role-Based Access

Validated Permissions

Every user - family, nurse, doctor, aide - gets a tailored view. No self-sign-up: each account is manually validated by the clinic administrator.

Secure Messaging

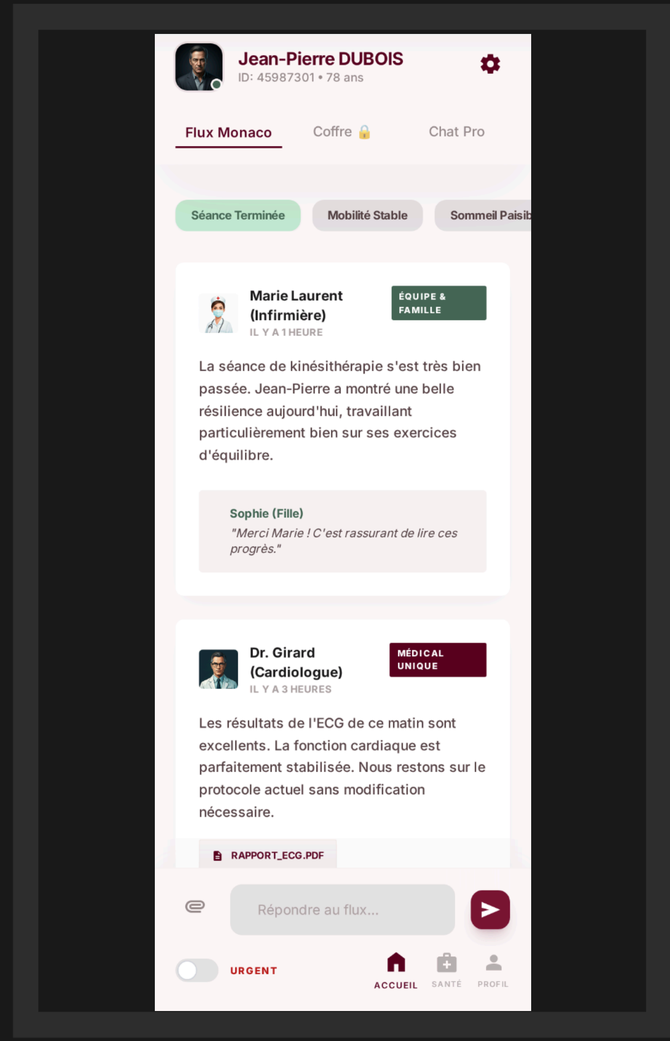
Professional Communication

Structured, encrypted care team chat organised by patient. No personal email, no WhatsApp - a compliant channel for every professional interaction.

Product in Action

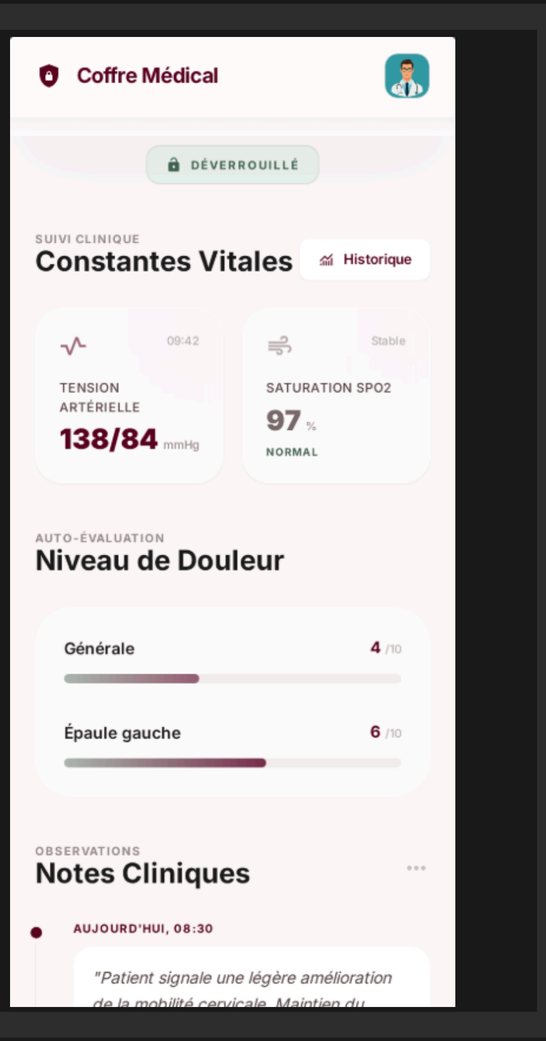
Welcome & Login

Role-based onboarding with access code or professional ID



The Flux

Real-time activity feed - medical, team & public visibility levels



Medical Vault

Biometric lock, vital signs charts & clinical dictation

Designed for Every Stakeholder

Four distinct profiles - each with tailored permissions, access level and pricing.

F

Family

From EUR29/mo

Receives a unique access code. Views the Flux, the assigned care team, and can log vital signs at home. Can approve or deny professional access requests.

Simplified UI | Approve access | Home vital log

H

Healthcare Professional

Free

Nurses, doctors, physiotherapists. Validated by the administrator before first login. Full Flux and Medical Vault access. Voice dictation for clinical notes.

Full Flux + Vault | Voice notes | Medical visibility only

C

Companion / Aide

Free

Non-medical home workers: housekeepers, meal assistants, delivery staff. Log daily activity updates visible to families. No medical data access.

Activity logging | Flux only | No medical data

G

Guardian / Curator

Tiered plan

Legal guardians or professional curators managing multiple patients. A consolidated dashboard across all cases with sliding-scale subscription by caseload.

Multi-patient dashboard | Tiered pricing | Full oversight

A High-Value, Measurable Market

Monaco: concentrated seniors, solvent families, and a 200,000-person addressable basin beyond its borders.

Business Model

Families and guardians subscribe. Professionals and companions are always free.

Family Subscription

Paid by the family - professionals are always free

1 patient	**EUR29 / month**
Additional patient	**+ EUR15 / month**
Healthcare professionals & companions Always free - unlimited per patient	**FREE**

Guardian / Curator Plan

Sliding scale - all care professionals included free

Up to 10 patients	**EUR250 / month**
Up to 30 patients	**EUR399 / month**
40+ patients	**Custom**

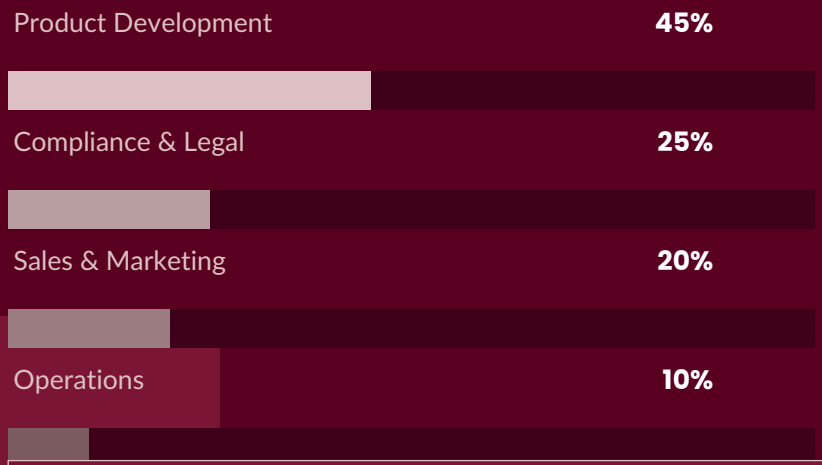
Revenue grows with each patient activated. Year 1 target: 200 family subscriptions + 10 guardian accounts.

Investment Opportunity

Building the Standard for Coordinated Home Care

Starting in Monaco - scaling to the French Riviera and beyond.

Where Investment Goes



What Investment Enables:

- Achieve CCIN regulatory compliance
- Migrate to HDS-certified hosting
- Publish iOS & Android native apps
